

## Features

- High-voltage, High-capacity Polypropylene film capacitor that produces remarkably clear sound with less coloration.
- Gold plated OFC wire for Internal wiring and gold plated terminals.
- Clearly indicated for polarity.
- For use as a replacement part for maintenance and repair of vintage audio and guitar amplifiers.
- Made in Japan.

\*Different valued capacitor will be available at a later date..

## Specifications

Model Number	AMCB-47/630
Capacitance	47 $\mu$ F $\pm$ 5%
Voltage	630 VDC
Insulation Resistance	1.0 $\times$ 10 <sup>4</sup> M $\Omega$ MIN. <small>Between the outer box and terminal</small>
Dissipation Factor	0.03% MAX
Dimensions	$\phi$ 49 $\times$ H124 (mm)

## Mounting Hole Dimensions (mm)
