

Features

- High-voltage, High-capacity Polypropylene film capacitor that produces remarkably clear sound with less coloration.
- Gold plated OFC wire for Internal wiring and gold plated terminals.
- Clearly indicated for polarity.
- For use as a replacement part for maintenance and repair of vintage audio and guitar amplifiers.
- Made in Japan.

Specifications

Model Number	AMCB-47/630	AMCB-10/630
Capacitance	47 μ F \pm 5%	10 μ F \pm 5%
Voltage	630 VDC	630 VDC
Insulation Resistance	Between the outer box and terminal	1.0 \times 10 ⁴ M Ω MIN.
Dissipation Factor	0.03% MAX	0.03% MAX
Dimensions	ϕ 49 \times H120 (mm)	ϕ 40 \times H75 (mm)

Mounting Hole Dimensions (mm)
